Fine tuned for each individual size, and sculpted foam footprint and foam thickness to provide a better fitting, and more comfortable PFD for people of all sizes.

HOBIE MIRAGE PFD

This PFD was designed for Vantage high back seats on Hobie Mirage Kayaks. The flotation in the back is thin for more comfort while seated and helps to prevent the vest from riding up as you pedal. A vent along the spine adds to the comfort. Front zip entry for easy on and off. Large pockets on the front for easy storage and access of small items. High waistline cut so the vest does not ride-up while pedaling. Huge arm cutouts and the short waist allow excellent freedom of movement. Adjustable side straps offer enough size variation for many layers underneath or none! Reflective tapes for visibility during low light conditions. Back logos vary between "H" and Penguin Logo. ! SAFETY TIP

LIFE VESTS: Get a good, comfortable life vest and WEAR IT! A life vest does you little good stored on your boat, especially if you get tossed into the water and away from your boat. Accidents happen and by their nature, they happen when you are not prepared. A life vest can keep you afloat until you can rescue yourself or you can be rescued by others. In the worst cases when injuries or cold water are involved, your life vest can make all the difference! Be sure everyone onboard your boat wears a life vest too! Pass the word! Federal law now requires that all persons below the age of 13 must wear a life jacket while aboard a boat.

PERFORMANCE FINS - ST TURBO!

Increase your performance or increase your fitness routine, you choose the fin that is right for you: Standard or Turbo... low or a higher gear! This is very evident when using a sailing kit. The added power and speed of the sail often outpaces the standard fins (similar to pedaling a bike down hill in first gear).

Want to go really fast? Add TURBOs. Hobie Mirage kayak users report as much as 10% increase in speed and more using TURBO Fins. But its not all about speed, you can get top end speed and a slower cadence for cruising (Less pedals per mile). All achieved with these larger and more efficient fin designs. These longer fins can also increase lateral resistance for sailing upwind.

Easily pedal out to sail or pedal home when the wind is too light. Add a SideKick ama kit for additional stability if desired. The MirageDrive pedal system's fins act as a keel or centerboard when in the down position offering the lateral resistance needed for upwind sailing.

SAIL KIT INCLUDES:

Mast*, sail (20.25 sq ft.), lines, fittings and storage bag.
(*2 Piece mast standard / 4 Piece mast for i-Series)

Add the large rudder #81397001 for more responsive rudder control. Adventure / Revolution 16 models can add the dagger board for enhanced upwind performance.

ROLLER FURLING KIT

This is the ultimate for easy operation of a Hobie Mirage sail kit. Start with the sail rolled around the mast. When you are ready... un-furl to expose the sail or leave a little rolled on the mast to test the wind! By partially unrolling the sail, you are "reefing" some of the sail for better control and stability. If you are ready for full power... roll it all out! Heading back to the beach? Roll the sail up tight on the mast and beach or dock the kayak with ease. Fits any Hobie Mirage sail kit (not for i-Series kayaks due to their stayed rig). The rolled sail will fit in current full-length sail bags. Hardware is easy to install and removal of the sail and control lines is simple for storage.

SAILING TIP!

SAIL POWER: Watch the sail, pay close attention to the trim or adjustment of the sail. When the front of the sail, just behind the mast, luffs or flutters in the breeze, you lose power. To start moving, pull the sail in just enough to stop the sail from luffing or turn the boat away from the direction the wind is coming from. There are also short ribbons hanging on either side of the sail called "tell tails". The tell tails react to air flowing over the sail and will help you see that the sail is pulled in too tight or too loosely. If you pull the sail too tight you will stall the sail power. The tell tail on the back side of the sail will drop or do circles. Ease the sail out until it luffs, then pull it in just a little until it stops luffing. You will adjust the trim whenever the wind changes direction or you change course.

BIMINI

Relax all day under the cool shade of our all new kayak Bimini. UPF 50+ fabric and sophisticated articulation feature provide sun and rain protection no matter the time of day. Customize your setup, multiple color options help create your unique look. The Hobie Bimini offers unprecedented comfort and sun relief to let you enjoy and extend your time on the water. Integrates with the Hobie accessory mount base for simple, no-drill installation to get you on the water in no time. The Aircraft grade aluminum mast provides a sturdy and stable base. Over-center, support beam adds extra rigidity and structure. A slight push retracts the beam, quickly collapsing for disassembly on the water should an unexpected squall pass through. Rear hooks easily fasten to pre-installed cargo padeyes and Bungees® for secure attachment and use on the water. **UPF 50+** fabric provides protection from the sun's powerful rays all day long, creating the space for longer and cooler days on the water. **Water-Resistant** Water-resistant coating guards against unexpected showers or ocean spray keeping you safe and dry from the elements. **Durable** The Hobie Bimini is designed to effectively withstand all of the action from your water adventures. The lightweight ripstop nylon is rugged and durable.

SIDEKICK AMA KIT

Great added stability for use when sailing, fishing, standing when sight fishing, diving or shooting photos! SideKick ama kit is simple, light weight and effective! Floats are inflatable.

The SideKick's cross arms adjust the float height with a simple "click-twist-click". Just like a paddle shaft adjustment. Three positions offer you high - medium - low positions. Set the floats high for cruising (less drag) or secondary stability. Use the medium or low settings for primary stability (less initial roll). Fine adjustments for float height are done by twisting the main crossbar within its mounts and tensioning with the fastening hardware.

Set up and use right off the beach or disassemble and deflate to store inside the hull. Then assemble and inflate when you get to your dive or fishing spot. Inflation is simple. Just blow a few breaths into each float through their one-way valves. Valve cap unscrews for rapid deflation. Installs with 4 bolts using expanding nuts. Not for use on Pro Angler models.

DODGER

DODGER

HOBIE DODGER

The Hobie Dodger is a spray, cool breeze and sun shade for your lower body. Deflect bow spray, block cool breezes and stay warmer in cold conditions.

Works like a small pop-up tent. Loops of bungee connect to the boat via small fittings installed along the rails. The entire dodger folds forward to enter or exit the kayak, to make pedal adjustments or reach items in the cockpit. An access panel is built-in for using the sailing rig. A great combination when there is wind and spray!

Great for hunters, animal and bird watchers as the Dodger conceals your legs movement. The Hobie Dodger makes your kayak a sit-inside sit-on-top!

Installs in minutes initially, but installs in moments once the fasteners are in place. Packs away into a small stow bag 5" round by 24" long (1.8 lbs).

Mirage Dodger Fits the Hobie Mirage Outback, Sport, Adventure and Revolution, Island kayaks (May fit other models with some modification to hardware placement). Includes an opening for a sail kit or Bimini mast. Island versions include a larger opening for the Island mast.

HOBIE ISLAND MAST HEAD WIND DIRECTION VANE

The mast head wind vane will help you keep your Island on the best angle to the wind for better sailing. Helps you understand shifts in wind direction so you can adjust course or sail settings. Achieve the most performance and optimal course. Up on the mast head is the least disturbed wind flow, so the optimal location for a wind direction vane. As you sail, wind directions are not typically constant. As the wind changes direction or oscillates, you need to adjust heading and or sail trim for best performance. Use the vane for rough adjustments and the wind tell tails on the sail for fine adjustments. This wind vane is designed for all Hobie Islands when not using a spinnaker kit. Simply slips over the mast head and tightens in place with a thumb screw.

72020356 MAST HEAD VANE

HOBIE ISLAND SPINNAKER/REACHER KIT

Add performance when reaching or running to your Hobie Island. Off-the-wind sailing is typically the slowest point of sail, add a spinnaker and the Island comes alive! The Hobie spinnaker kit includes a snuffer launching and retrieving bag which makes handling the spinnaker as easy as can be. Simply pull on the halyard line to launch, set the sheet and off you go! To lower, ease off the halyard and pull on the retrieval line. The spinnaker drops and stows directly into the snuffer system. The kit includes a mast head wind direction vane for use while rigged for the spinnaker. The mast head wind direction vane will help you keep the Island on course for spinnaker sailing. Spinnakers are for broad reaching across the wind to directly sailing down wind. They are not for sailing higher angles than a reach across the wind. *May require sail head modification by a sailmaker in older model Islands. Requires several inches of mast above sail head to fit into mast head fitting.

Note: Spinnaker sailing can be challenging and may not be for the novice sailor. We strongly suggest learning to sail your spinnaker in light winds. Once you learn how to handle a spinnaker... You are going to LOVE IT! Spinnakers add a whole new dimension to your sailing experience.

CARTS

Kayak Carts or Dollies are a must for easily transporting your kayak from car to water's edge. Simply roll the kayak down to the water and off you go! All of the latest Hobie Kayaks can use "Plug-in" carts. "Plug-in" carts do just that...they plug right into the bottom of your kayak. Choose Standard for light duty and solid surfaces, Heavy Duty for heavy loads and rough terrain or the "all-terrain" Hobie Trax "2" version which is the best over soft sand. Each cart has a sturdy stainless steel frame. Some older models, i-series or other brands of kayaks may require the use of a different type of cart.

POST COLLAR / CLAMP FEATURE (80044201 Set Of 2)

Collar clamps help reduce the direct loading of the cart on your kayak's bottom / keel. Direct loads on hull bottoms can cause deformation of the kayak. Even loading at scuppers and hull bottom reduces hull-bottom deformation issues. Included with all new plug-in carts.

CAUTIONS

Be certain that the cart inserts clear through the kayak and protrudes into the cockpit / cargo area surface. Kayaks should never be left on carts for prolonged periods of time.

**Note Tandem Island use issue. Plug in carts are not recommended for the Tandem Island due to weight. Using a plug in cart can damage the scuppers or deck area in the hull.*

Choose beach wheels for use over soft sand or other surfaces. Choose the tuff tire if your launch surfaces are solid. The handle makes it easier to insert or remove the cart under the boat or pull along when un-loaded. The handle also acts as a “kick-stand” to keep the cradle upright during loading. The handle and wheels are easily removable for storage. The Pro Angler / Universal dolly will fit a wide variety of Hobie Kayaks including Pro Anglers, Outback and Oasis. KAYAK COVERS

Easy to install or remove, fits over the hull (like a fitted sheet on a mattress). Straps and pull string adjust for a tighter fit. Cross straps secure the cover on your hull for windy conditions. Heavy duty UV resistant canvas material in a neutral color for better aging. Universal covers fit over the hull when upright or upside down. To help prevent distortions to the hull bottom shape, Hobie recommends that our kayak hulls be stored upside down resting on the cockpit rails. This is also best for deflecting rainwater and prevents water pooling in the cockpit or on the cover. When planning to store a hull upright, be sure to properly support the hull bottom to prevent hull distortions. Universal fit covers may not entirely cover some hulls, especially with accessories installed.

70060001 HOBIE UV PROTECTANT

MAGICA RUST REMOVER

Easily clean rust stains from fiberglass, plastic surfaces, metal parts or fabrics. Although metal parts are made from high quality stainless steel, machining tools often leave carbon particles imbedded in the metal surfaces. This material can bleed a rust stain onto other surfaces. Magica simply dissolves the rust away.

TECH TIP!

"WELL NUT" FASTENERS are tubular rubber fittings with an imbedded brass nut in the base. These are similar to a molly screw commonly used in sheet rock. They expand within the structure and give you a virtual backing nut and washer in an area that is inaccessible. Well nuts can be used for mounting many accessories to kayaks. Simply drill a hole as a net-fit dimension for the well nut. Insert the nut and position the hardware to be fastened. Insert and thread in the screw. Tighten until very snug. The brass nut is drawn up against the inside surface of the kayak which expands the rubber to a dimension that is too large to pull through the hole.
