

Lowrance® Fishfinder Installation Guide

Mounting Transducers & Powering and Mounting the Head Unit

Depending on the model of your kayak and the model of your fishfinder & transducer there are different parts requirements for installing your unit. The following document provides easy-to-follow flowchart diagrams for transducer mounting, broken down by the type of transducer mount your kayak is equipped with. The document covers kayaks not equipped with a factory installed transducer mount as well. Following the transducer installation flowcharts is a guide for mounting and powering Lowrance fishfinder units.

*Mounting transducers from brands other than Lowrance may require modifications to your transducer mounting plate.
