

#3128 - TRAMP STORAGE BAG.

#3128 / Page 1 of 1

The Trampoline Storage Bag is designed to be attached to the trampoline so that the zipper is parallel to the center lacing of the trampoline. *Four shock cords and eight hooks are provided for its attachment. Either end can be used as the front, although it is logical to have the zipper tab at the rear with the tramp bag completely opened. Attach the front of the tramp bag to the hiking strap by passing the shock cord through the loop in front of the hiking strap box stitching. Attach the rear by passing the shock cord around the hiking strap.

*Note - Ensure that the shock cord is fully seated in the hook before setting the collar.
