

Included in the Tie Down Set are a pair of tie downs, a pair of mounting eye bolts with hardware and a pair of bungee hoops. Bungee hoops are for securing the Adventure Island mast or masts to the optional trailer Tower System.

To begin you will need to install the fixed end of the tie downs to the middle of each trailer crossbar. In the first photo you can see this fixed end mounted to one of the bolts that is used in our Adventure Island Trailer Tower System. If you do not have a tower system you can mount this end to one of the crossbar mounting bolts.

To mount the eye bolt on the forward crossbar you'll need to drill a hole near the outside of the crossbar and install the tie-down eye bolts.

To install the eye bolt on the rear crossbar you'll substitute the new eye bolt with the installed outer cradle bolt, this way the eye bolt will be mounted upside down.
